Professional Summary

BCA graduate (2026) with internship experience in FastAPI, Flask, and PostgreSQL. Built projects spanning LLM integration, secure authentication, audio processing, and REST API design.

Technical Skills

Languages: Python, SQL, HTML/CSS, JavaScript (basic)

Backend & Frameworks: FastAPI, Flask, REST APIs, SQLAlchemy, Pydantic

Databases & Tools: PostgreSQL, pgAdmin, SQLite, Git, GitHub, Postman, Docker, Linux, VS Code

AI & Libraries: NumPy, Pandas

Concepts: JWT Authentication, OTP Verification, OOP, Data Structures & Algorithms, RBAC

Experience

Software Engineering Intern March 2026 – May 2026
Pilikula Regional Science Centre *Mangaluru, Karnataka*

- Built 10+ REST API endpoints for user authentication, interview session management, and AI response processing using FastAPI and PostgreSQL.
- Integrated a speech-to-text pipeline to convert voice responses into text, enabling automated evaluation across 3+ interview question types.
- Tested and debugged 5+ backend modules using Postman; used NumPy and Pandas for data preprocessing and structured response validation.
- Delivered fully documented modules within a 2-month timeline and presented the final system to stakeholders.

Projects

InterviewAI – AI-Powered Mock Interview Platform *FastAPI, PostgreSQL, Gemini API, Docker*
github.com/thammi-mhd/interview_mock

- Built a full-stack AI mock interview platform with a modular FastAPI backend, PostgreSQL via SQLAlchemy, and Dockerized deployment across 5+ route modules.
- Integrated Google Gemini API for role-specific question generation and AI feedback; added voice submission via SpeechRecognition and Pydub for 3+ interview roles.
- Secured with 5-layer auth stack: JWT tokens, OTP email verification, bcrypt password hashing, Pydantic validation, and Slowapi rate limiting.

JustMobile – E-Commerce Backend Platform *Flask, PostgreSQL, SQLAlchemy*
github.com/thammi-mhd/just-mobile-ecommerce

- Built an e-commerce backend with 15+ REST endpoints covering product catalog, cart, and order workflows using Flask, PostgreSQL, and SQLAlchemy ORM.
- Designed normalized relational schemas across 4+ tables with bcrypt authentication, RBAC, and deployment-ready entry points (`wsgi.py`, `Procfile`).

TaskFlow – Task Management REST API *Flask, JWT, SQLite/PostgreSQL, Swagger*
github.com/thammi-mhd/REST-api-demo-

- Built a task management API with 8+ endpoints covering JWT authentication, RBAC (admin/user roles), and full CRUD operations using Flask and SQLAlchemy.
- Added Swagger (Flasgger) docs, structured request logging, and a Postman collection covering 100% of endpoints.

FaceAttend – Face Recognition Attendance System *Python, OpenCV, face_recognition*
github.com/thammi-mhd/face_recognizer

- Built a real-time face recognition attendance system using OpenCV and the face_recognition library, fully automating attendance logging with 0 manual entries.
- Pre-encoded facial data for 10+ identities across 3 modularized components (capture, encoding, recognition) with timestamp-based CSV logging.

Education

Bachelor of Computer Applications (BCA) August 2023 – June 2026
Yenepoya Institute of Arts, Science, Commerce and Management, Mangalore *Aggregate: 72.63%*

- **Specialization:** Artificial Intelligence, Cloud Computing, and DevOps (in partnership with TCS)

Pre-University Course (PUC) – Commerce August 2021 – March 2023
St. Philomena Pre-University College, Puttur

Certifications

Introduction to Artificial Intelligence – *IBM (Coursera)* *October 2024*

Getting Started with Git and GitHub – *IBM (Coursera)* *September 2025*

Additional Information

Competitive Programming: Actively solving DSA problems on LeetCode focusing on arrays, trees, and dynamic programming.

Hackathon: Core team member in an AI-focused hackathon; delivered an ML-based tourism recommender system.
